Covid-19 & Bookings Out of Chile & Argentina

We continue to work with our partners to maximize opportunity for movement out of South America, but do note increasing delays. Official institutions in Chile and Argentina continue to allow outbound cargo shipments, but are operating with minimum staffing levels and increased demand.

Further to this, Argentina has extended their mandated quarantine to mid-April at this time.

Shipping lines continue to operate in Chile, but are omitting some ports of call in their standard routes, Santiago is now in general quarantine.

We do expect delays of 3-4 weeks, and recommend at this time that our agent community prioritize most crucial needs for those shipments still to move, and escalate these to the top of your list. Please email our Vladyslau Marko at vmarco@containerworld.com for further inquiry post-assessment.

We hope for everyone's present and continued health during the Covid-19 situation, both at work, and at home.

Regards,

Andre Ruditsch
