

ARGENTINA'S
WINE REGIONS
from North to South

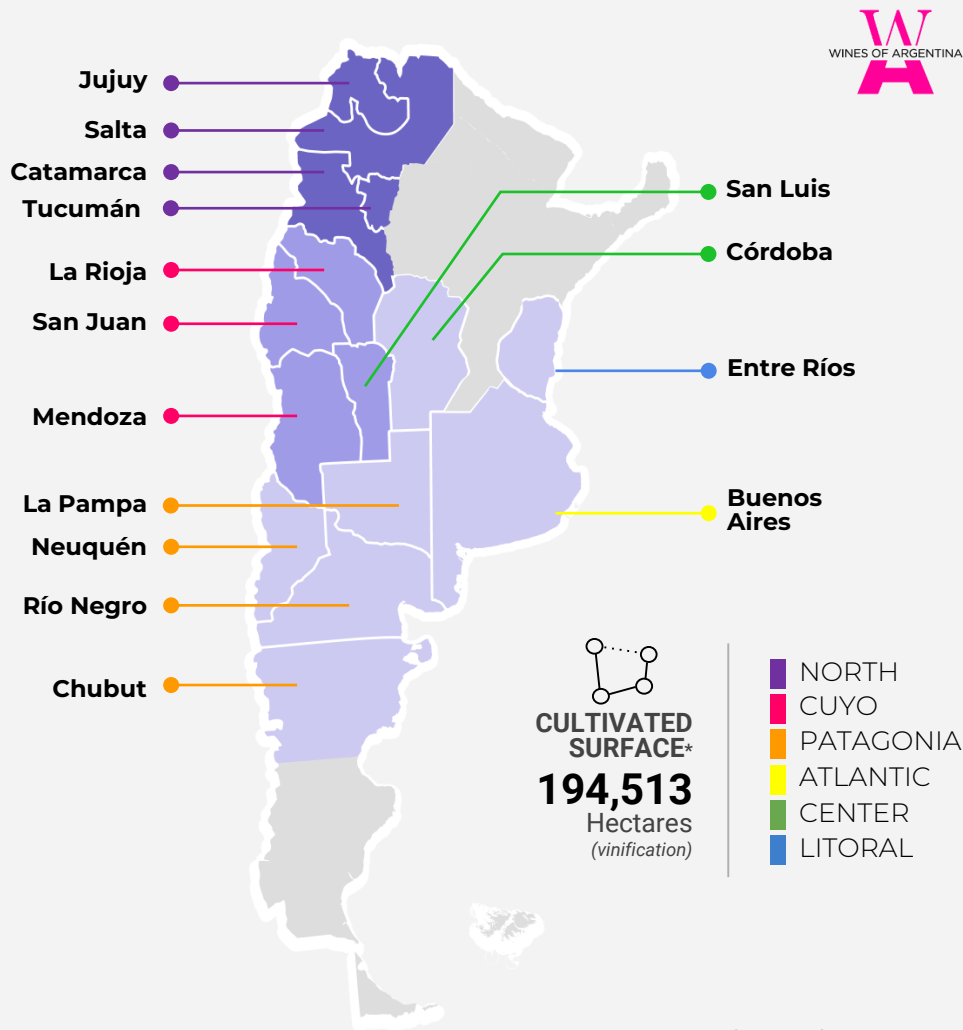

WINE REGIONS in Argentina

Traditional vine-growing regions in Argentina are located in an ***extensive strip that crosses the country from north to south***, at the foothill of the Andes.

In recent years, producers ***have extended the limits of Argentine wine*** to the west, into the heights, and south looking for cooler temperatures, and to the east, next to the Atlantic Ocean.

Non-traditional wine regions are also gaining relevance in the center and northeast of the country, contributing to ***showcase Argentina's diversity***.

- Cuyo is an arid yet fertile region located in the center-west of the country, at the **foot of the Andes mountain range**. It is **the most prolific region in South America** and one of the most important worldwide.
- Cuyo means “country of deserts” in the Huarpe milkayac dialect. The region has **desertic climate** with little vegetation.
- Most of the rivers come from the **meltwater**, having its greater flow from the spring. Water is stored in reservoirs for human consumption and crop irrigation, through a network of channels that support the oasis.
