

ARGENTINA'S  
**WINE REGIONS**  
*from North to South*

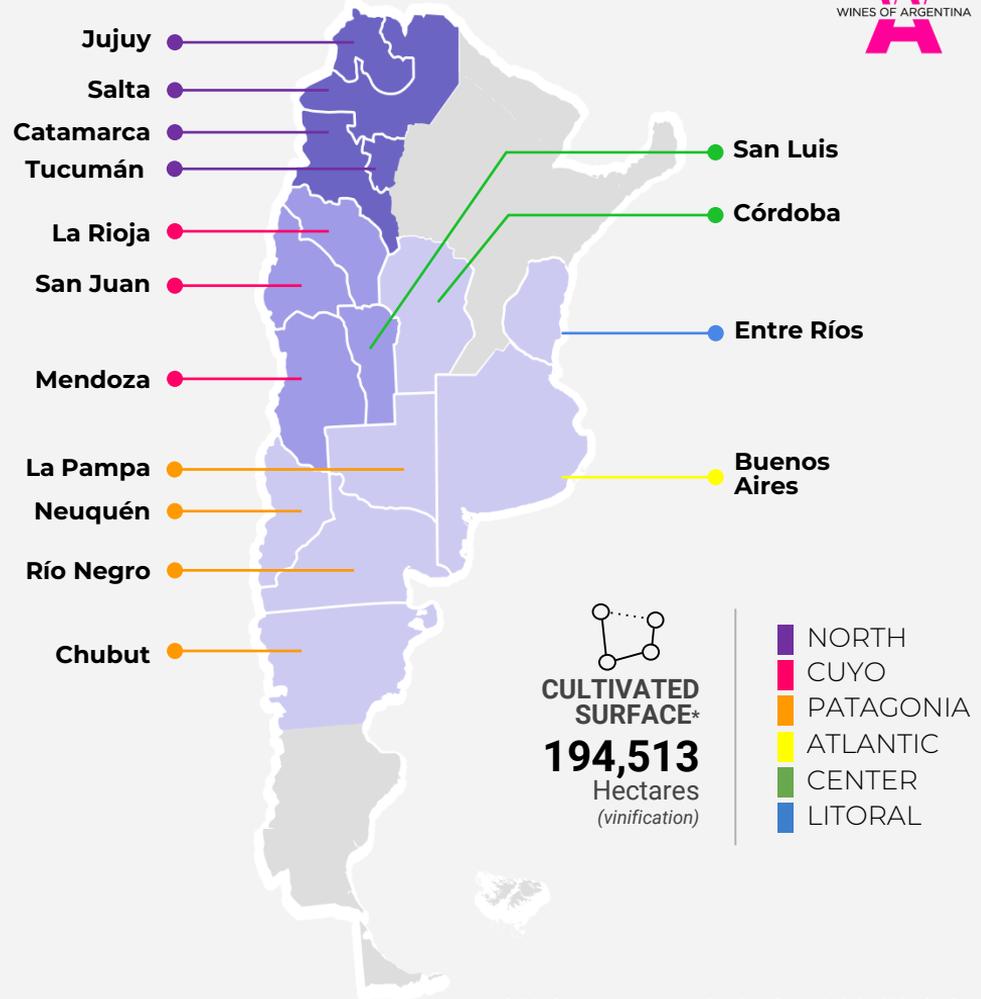

# WINE REGIONS in Argentina

Traditional vine-growing regions in Argentina are located in an **extensive strip that crosses the country from north to south**, at the foothill of the Andes.

In recent years, producers **have extended the limits of Argentine wine** to the west, into the heights, and south looking for cooler temperatures, and to the east, next to the Atlantic Ocean.

Non-traditional wine regions are also gaining relevance in the center and northeast of the country, contributing to **showcase Argentina's diversity**.

# PATAGONIA & ATLANTIC

The search for new terroirs has led Argentine producers to **extend the limits of growing vines** to the south (beyond parallel 45°) and to the east, over the edge of the Atlantic ocean.

The southernmost productive vineyards in the world are located in Chubut, beyond 45°south latitude.

Chapadmalal GI is the most eastern wine area in Argentina (Atlantic viticulture).

# PATAGONIA & ATLANTIC REGION

## Location

It is a very extensive region cultivated from parallel 36° to beyond parallel 45° South latitude.

## Key factors of terroir

- Constant westerly winds = health + thickening of skins.
- Abundance of sunlight hours (latitude effect).
- Location of the vineyards with respect to the valleys: proximity to the riverbeds or the river banks.

## HIGHLIGHTS

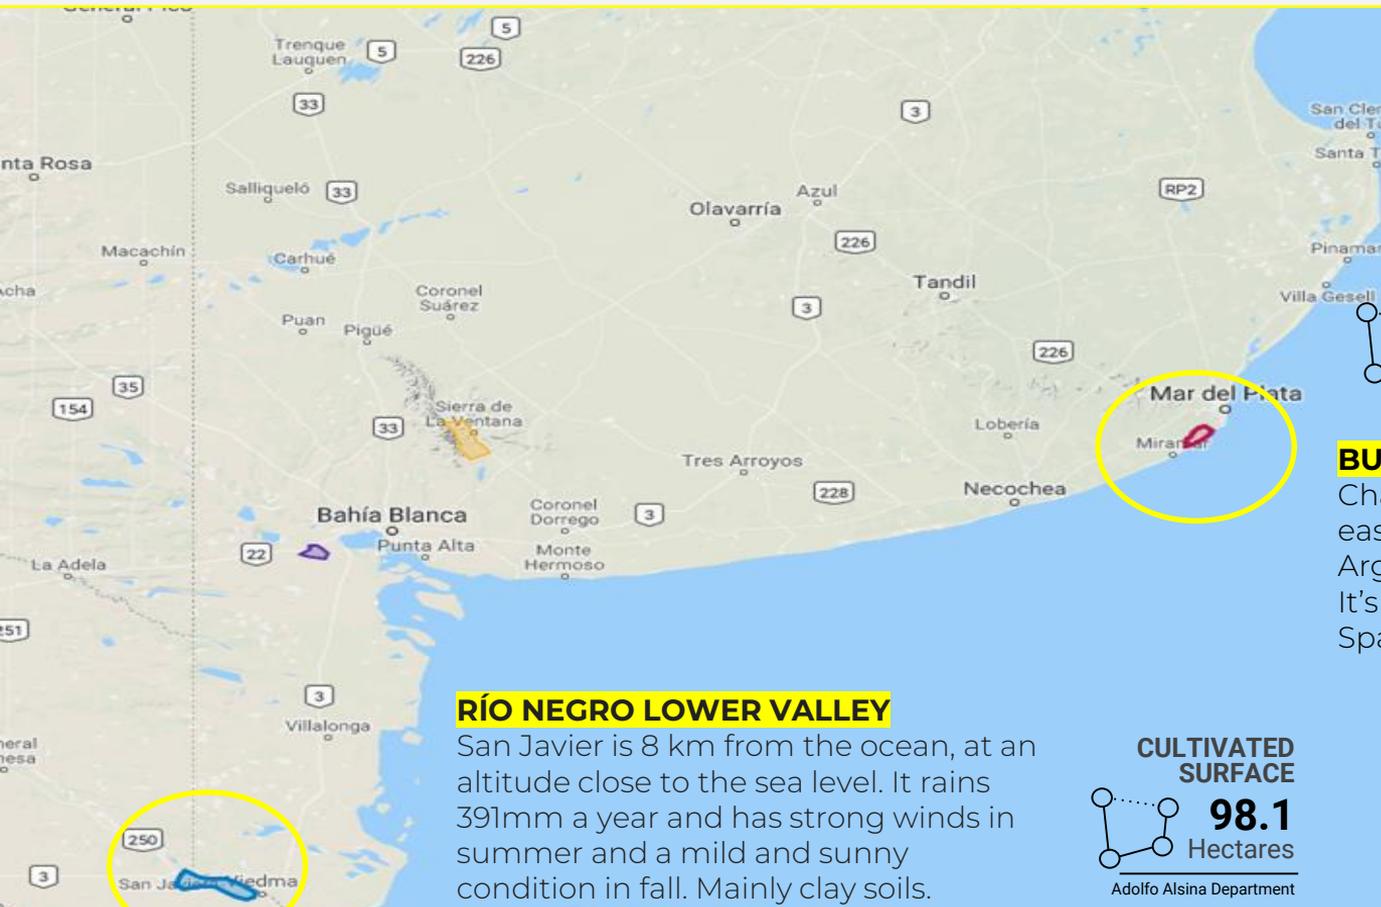

- In the 1990s vine plantation in Argentina was deregulated.
- Some ventures emerged in the Atlantic region.
- The idea of developing oceanic wines gained new strength in 2007 with the development of new vineyards in Chapadmalal.
- GI Chapadmalal was approved in 2014 and GI Balcarce in 2022.
